

Learning Objectives

Understand the benefits and risks associated with a Health Information Exchange (HIE)

Discuss the opt in versus opt out processes related to an HIE

Review the privacy law restrictions and limitations

Determine the best practices for proper process and procedure development to support compliance with the applicable privacy and security regulations

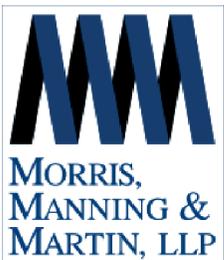

August 18, 2022 | 2 - 3 pm | Webinar

Benefits & Risks of a Health Information Exchange

This session will include a discussion of the benefits and risks related to the exchange of patient information through a Health Information Exchange. This review will include an analysis of the applicable federal privacy law requirements, including HIPAA and Part 2 regulations. Learn about best practices to capture the proper patient authorizations and to implement safeguards to comply with applicable laws.

This session is recommended for Health Information Management Leaders, Compliance Officers, Privacy Officers, Chief Operating Officers and Executive Team Members responsible for the use and disclosure of patient protected health information.
