

Monthly Utilization Report

August 2023

Highlights

Utilization metrics remain below pre-COVID baselines with the exception of ambulatory surgery which recovered to near baseline over recent months. See Fig. 1 below.

Fig. 1: Hospital Utilization Percentage Change July - August 2023 Compared to January 2020

Psychiatric admissions across all nine hospitals have increased over the past six months (Fig. 2). Further examining utilization patterns underlying this increase shows the median for the Psychiatric Institute of Washington and Saint Elizabeths Hospital compared to the median for the other hospitals. These two hospitals showed the greatest increase in psychiatric admissions during this time frame as shown in Fig. 3.

Fig. 2: Psychiatric Admissions Across All Nine Hospitals

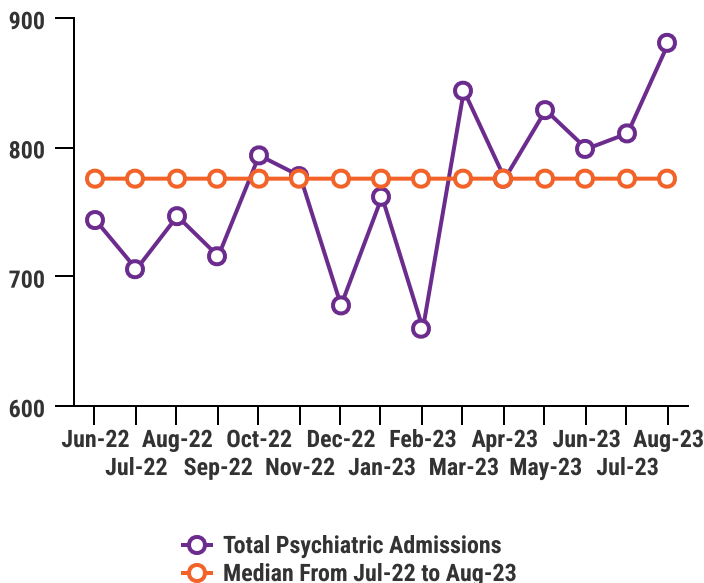

Fig. 3: Psychiatric Admissions at the Seven Hospitals vs. PIW and Saint Elizabeths
