

Monthly Utilization Report September 2023

Highlights

Utilization metrics continue to remain below pre-COVID baselines with the exception of Observation Patients which recovered to near baseline over recent months. See Fig. 1 below.

Fig. 1: Hospital Utilization, Percentage Change August - September 2023 Compared to January 2020

The recent pattern for psychiatric admissions across all nine hospitals remains above the median. Although Fig. 3 shows a statistical shift in civil commitment volumes above the median (six points in a row) from March through August, admissions to civil commitments declined to below the median in September.

Fig. 2: Psychiatric Admissions Across All Nine Hospitals

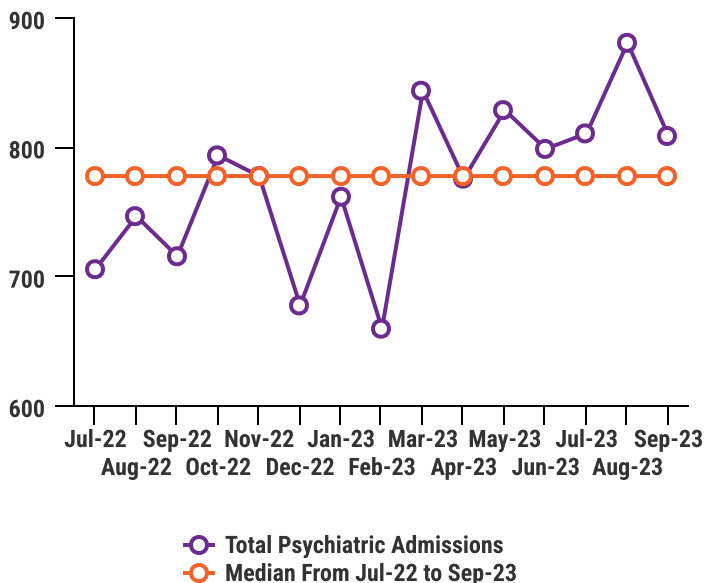

Fig. 3: Civil Commitment Admissions
