

Monthly Utilization Report

December 2023

Highlights

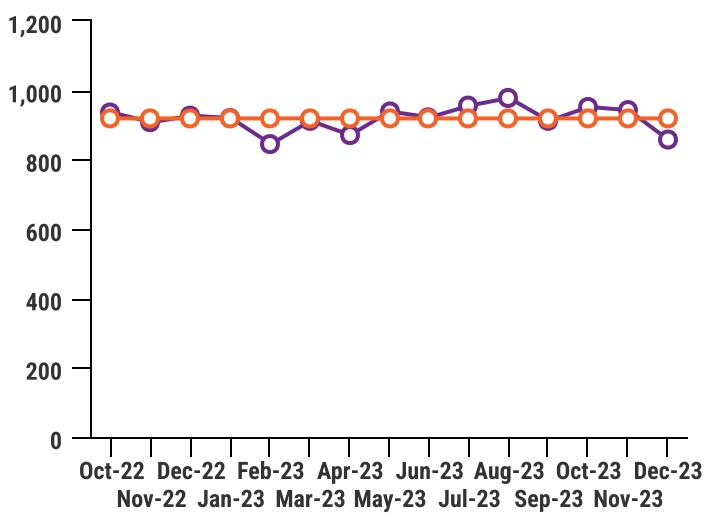

Most utilization metrics saw a decrease from November to December with the exception of emergency department visits and psychiatric admissions. While ED visits present their highest volume in the past 15 months, ambulatory surgeries on the other hand saw their biggest decrease in volumes this month going from -4% below the pre-COVID baseline in November to -14% in December (see Fig. 1 below).

Fig. 1: Acute Care Hospitals, Percentage Change November - December 2023 Compared to January 2020

Newborn admission saw a decrease in volumes this month and are now below the median as depicted in Fig. 2 below. Civil commitment admissions on the other hand remain above the median of 198 after the dip in September 2023 as shown in Fig. 3.
