

Advance Care Planning

Learn More

CRISP DC will host webinars to demonstrate the MyDirectives for Clinicians application in the HIE, along with Q & A sessions.

Please register at crispdc.org/acp for a session that works best for you.

If your team is unable to attend, recordings, additional information is available at crispdc.org/acp.

To get access and involved in this initiative or to schedule an individual informational session, please contact the CRISP DC Outreach team at dcoutreach@crisphealth.org.

DCHA is partnering with DHCF/CRISP DC to provide our hospitals with access to an electronic advance care planning platform aimed at improving staff workflow and supporting the quality of patient care.

MyDirectives for Clinicians Integrated in the CRISP DC HIE

This user-friendly platform allows health care providers to create, upload, and view new digital advance care planning forms whenever and wherever they are needed across all patient care teams with access to the DC HIE. Advance care planning forms available through the platform include DC MOST, National POLST, Psychiatric Advance Directive and Universal Advance Digital Directive.

How MyDirectives for Clinicians Improves the Quality of Patient Care

- All care teams, including ambulatory providers, will have access to patients' current care planning goals, objectives, and decisions across future, urgent, and end-of-life care.
- Facilitates care that is more personalized and aligned with the patient's preferences and priorities.
- Enables smooth transitions between different care settings as all providers are aware of the patient's care plans.

Benefits of Accessing the MyDirectives for Clinicians

- Scan and upload existing advance care planning documents to the DC HIE, allowing more than 1,000 DC organizations to view the documents.
- Display forms in the DC HIE anytime and anywhere across the continuum of care.
- Ensure other care teams, such as ambulatory providers and DC Fire and EMS responders, can access this information to honor the patient's care decisions.
- Allow patients, through the MyDirectives patient portal, to view or upload their Advance Care Planning documents, or create their own Universal Advance Digital Directive.

Search and View Advance Directives in the CRISP Care Coordination Tab

Any CRISP DC HIE user will be able to search and view their patient's most current decisions on future, urgent, and end-of-life care planning goals and objectives.

How Do I Get Credentialed to Access MyDirectives for Clinicians in CRISP?

Email the CRISP DC team at dcoutreach@crisphealth.org for more information and to begin the MyDirectives for Clinicians onboarding process.
