Monthly Utilization Report
August 2026

Highlights

District hospitals experienced moderating overall utilization in August 2026, with declines in several major service areas alongside increases in behavioral health and neonatal activity.

- Acute care admissions decreased to 8,247, down from 8,474 in July, while specialty care admissions declined from 705 to 665.
- Emergency department visits decreased from 32,355 to 31,660, indicating somewhat lower overall hospital demand during the month.
- Behavioral health utilization moved in the opposite direction. Psychiatric admissions increased from 771 in July to 814 in August, while civil commitment admissions rose from 123 to 132, although civil commitments remained substantially below the levels observed earlier in the 15-month reporting period.
- Maternal and neonatal activity were mixed. Newborn admissions declined from 809 to 783, reversing the recent upward trend, while neonatal admissions increased from 157 to 183 as shown in Table 12 and 14 of the report.
- Observation admissions showed the most pronounced monthly decline, falling from 3,112 in July to 2,328 in August (see Fig. 1 below).

Fig. 1: Monthly Volumes and Month-Over-Month Change, July 2026 vs. August 2026

Key Takeaways

- Lower overall utilization across most services, including acute, specialty, emergency, newborn, and observation.
- Increases in behavioral health and neonatal activity, with higher psychiatric, civil commitment, and neonatal admissions.
- Observation admissions saw the largest decline (-25.2%).
- Overall, August 2026 show moderating hospital demand, with select areas of continued growth.
